

Under Construction!

What Every Parent Must Know About Your Teen's Brain Development

There is increasing attention to teenager brain development and its impact on how teens behave and take risks - such as using alcohol and drugs - and what this means for parents of teens.

Come learn more about what parents and other interested members of the community can do to keep our teens safer, healthier, and substance-free through the middle and high school years.

Our program will feature Dr. Ruth Potee, recently honored by the Franklin District Medical Society as the 2015 Community Clinician of the Year. She is a Board Certified Family and Addiction Medicine Physician.
