

NutriKids School Lunch Program

What is the NutriKids School Lunch Program?

Ipswich Public Schools has implemented the NutriKids program to centralize the Food Service management system in order to streamline the school lunch purchasing process and provide parents with an easy method of tracking their child's food purchases. The NutriKids program includes state of the art Point of Sale terminals with keypads and barcode readers to reduce the time students are standing in line to checkout. The system also utilizes sophisticated management functions that keep student information up to date and automate many of the food service manager's tasks.

Who will be using the NutriKids notification system?

Students in all schools will use the new system to purchase food items from the cafeteria by either entering their student ID on the keypad or providing their name to the cashier. Parents will be able to create a free online account to keep track of their child's transactions and maintain their account balance. Food Service personnel in all schools will use the centralized database to track food transactions, generate reports and communicate with parents.

How do parents access the NutriKids system?

NutriKids uses an online payment system called "MySchoolBucks". (There is also a mobile app available)

1. To create an account with access to your child's account:
2. Click on the link: <http://www.myschoolbucks.com>
3. Click on "Register for a Free Account"
4. Follow the screen prompts to create you new account.
5. Once your account information has been submitted, you will be able to add your child's account by entering the child's name, birthdate and student ID.
